License allowing “Nasto Inxhiniering” Sh.p.k. to operate in the field of Ionizing Radiations, released by the Radiations Protection Authority.

Background:

Nasto Inxhiniering was founded in 1999 initially as a standalone unit within a liquefied petroleum gas (LPG) marketing company with activities in southern Albania. This unit was created to satisfy the company needs to build gas plants for their clients. In 2008 Nasto Inxhiniering was registered as a separate entity and legally independent, thus becoming a viable alternative in the Albanian market. Throughout this time, company grew up trying to give always the best solutions in mechanical engineering.

Working field:

Nasto Inxhiniering main activities:

- Non Destructive Testing and inspection.
- Design, engineering and carrying out of gas and oil plants.
- Prefabrication and erection of metallic tanks.
- Prefabrication and erection of piping works for gas and oil industries.
- Maintenance, supervision, assistance and consulting.

NDT experience:

- X-ray and Gamma ray radiographic testing of pipeline welds on the site "La Petrolifera Italo-Albanese" in Vlore (PIA), year 2008-2009.
- Radiographic testing of crude oil tanks, Bankers Petroleum Ltd Marinez, year 2008.
- Radiographic testing of welds and vacuum box testing of floor of oil tanks, Kastrati sh.p.k. Porto Romano, Durres, year 2008-2009.
